PROPOSAL TO PUT STREET MARKINGS AND SIGNS ON  
HEADQUARTERS COMPOUND TO LEAD VISITORS TO  
PROPER PARKING AREAS

18 Oct '82

Colored arrows painted on the various compound road surfaces are desired for the following reasons:

- a. To easily and clearly lead visitors to proper parking areas.
- b. Reduce time required at gates for FPOs to direct visitors.
- c. Reduce the number of parking tickets issued to visitors who have unknowingly parked illegally.
- d. Increase security by restricting taxi cabs to the road ways leading to the front of the building.
- e. Eliminate confusion for all new employees and visitors.

This proposal will require adding or altering certain road signs. The alterations to existing signs will be minor requiring the arrows to be color coded and pointed in the proper direction. It is proposed the arrows be colored red, blue and green.

The arrows will be painted approximately every 50 feet except at junctions and turning points where they would be closer together. It is estimated that approximately 239 arrows would be required. Following is a break down of the arrows required:

Gate 1 to VIP lot	57 blue arrows
Gate 3 to VIP lot	50 blue arrows
VIP lot to North A Lane	32 green arrows
North Road to North A Lane	17 green arrows
Gate 1 to West Lot	45 red arrows
Gate 3 to West Lot	38 red arrows

Cost is estimated to be less than \$8,000.
